

PORTABLE MESSAGE BOARD

This new LED Portable Message Board is the latest in signage solutions, and has been engineered with the latest technologies to give it a smoother, slimmer profile. It's crafted in beautiful anodized lightweight yet durable aluminum, to make the entire display weigh less than 35kg/77.16lbs, making it more portable and easier to install. The LED portable message board allows for simple content upload from a USB or SD card. This display enables playback of video, audio, and still pictures at anytime from anywhere. Its straightforward onscreen menu makes it easy to schedule content without complicated configurations.

The Smart Module forms the heart of every display unit and delivers powerful video processing platforms, ensuring all operations converge, thereby ensuring seamless connections like screen monitoring operations and auto-detect work continuously. Each display is embedded with a remote control system. In addition, the preintegrated software enables you to connect the panels with a PC or Android devices from a single location via RJ45, WIFI, 3G, USB and HDMI. That makes it so easy to identify your display and manage settings like brightness and contrast or simply play your content directly from your device be it a laptop, tablet or smart phone.

FEATURES | SPECIFICATIONS | BENEFITS

- **Pixel Pitch** 2.571 mm/.094 inches
- **Pixel Dimensions** 756H x 224W
- **Display Dimension (H x W x D)** 1944 x 576 x 35 mm/76.53 x 22.67 x 1.375 inches
- **Weight** 35kg/77.16lbs
- **Brightness** $\geq 1200\text{cd/m}^2$
- **Processing Depth** 12 bits
- **Refresh Rate** > 1000 Hertz
- **Contrast Ratio** 3000: 1
- **Operation Power** AC110/240V, 50-60Hz
- **Average Power Consumption** 240W per panel
- **Display Mode** Local playback via embedded player or Live playback via HDMI
- **Signal Output** HDMI
- **Connection Type** Ethernet/WIFI/3G
- **Supported Video/Graphic Files** MPEG/H.264/JPEG/TIFF/PNG/GIF/BMP
