

# SSL 500 CONSOLE

The SSL Live features 192 scalable I/O paths, at 96 kHz/24-bit flexible routing, powerful automation and onboard effects, and is based on SSL's new Tempest processing platform, built into the console, with 64-bit internal processing. The control surface showcases a high resolution, 19" central touch screen that acts as the hub of the console with tablet style multi-touch gesture control, giving visual feedback and access to system configuration menus and the effects rack.

## FEATURES | SPECIFICATIONS | BENEFITS

- High resolution 19" central touch screen
- 144 of the mix paths are full processing paths and 48 mix paths are dry
- 36 x 36 matrix handles output routing to the PA system
- Twelve assignable "quick controls" (each with a rotary and three buttons)
- 32 VCA's and ten Mute Groups
- Local I/O connectivity — analog XLR, AES-EBU digital, MADI coaxial/optical and USB) built into frame
- 192 scalable I/O paths, at 96 kHz/24-bit flexible routing
- Channels have SSL's studio grade SuperAnalogue™ mic preamps with 24-bit/96k Hz A/D D/A conversion
- Fader tiles can display up to five scrollable layers, with up to five vertical banks
