

# CLEAR-COM HELIXNET DIGITAL INTERCOM

HelixNet is a digital partyline system with up to 24 channels of full-duplex audio and program audio over any shielded twisted-pair cable or LAN. The user can select any 4 of up to 24 channels with the ability to talk and/or listen on the selected channel. The front panel of the HMS-4X has easily accessible separate headset and mic buttons, a speaker with a rotary knob to control listen volume levels, multi-color LED levels, a Stage Announce button, a Remote Mic Kill button and an All Talk button. The ease of its Plug-and-go installation with hardware auto-discovery enables more efficient installation and integration.

## FEATURES | SPECIFICATIONS | BENEFITS
