

ROBO JR PTZ & ROBOTIC CAMERA PROMPTER KIT

The teleprompter works well with standard-size PTZ cameras, as the wide beamsplitter provides for a wide amount of left-right panning. The teleprompter comes with an aluminum extrusion frame, which enables mounting the camera to the prompter without requiring counterweights. You can mount the camera to the prompter and mount that setup to your tripod in a traditional manner.

Flip-Q Pro software, with a dual-screen scrolling engine, reverses the secondary PC or Mac laptop output without reversing the operator's display. This enables the use of non-reversing VGA displays without sacrificing the functionality or performance. It features an RTF text editor to modify the look of the text, and allows you to import RTF and TXT files. The software comes on a USB dongle so that it can be used on multiple computers. Plug the dongle into the computer you want to use at a given time.

FEATURES | SPECIFICATIONS | BENEFITS

- Total 60° viewing angle
- 30° Viewing Angle Left
- Total 60° Camera Movement
- 30° Movement Left
- 1 PTZ or Robotic Camera
- Upside down mounting for more camera mobility

MONITOR

- 19" diagonal
- Built-in reversing
- VGA, HDMI composite inputs for Regular 400 NIT
- HD-SDI, VGA, HDMI inputs for HighBright 1000 NIT
- LED backlit
- AC adapter included, battery operable
- When using PrompterPeople Auto-Reversing monitors, you will not need to use the Flip Function in the flip Q Software.
- When using a 3rd Party monitor you may need to use the Flip Function in the Flip Q Software

TALENT MONITOR

- 24" diagonal
- 400 NIT or 1000 NIT Brightness Levels
- VGA, HDMI composite inputs for Regular 400 NIT
- HD-SDI, VGA, HDMI inputs for HighBright 1000 NIT
- LED backlit
- AC adapter included; battery operable
- VESA Mount Included
- Talent Bracket Included (and easy to install and remove)
- 7 LB Counter Balance weight Included
