

7.5 MM LED

The 7.5MM makes use of a revolutionary new black waterproof LED, improving the contrast enormously. The tile allows for flexible, creative design with fast and easy installation.

FEATURES | SPECIFICATIONS | BENEFITS

- **7.5MM LED** display pixel pitch
- **Special surface treatment** with higher contrast and viewing angle
- **Lightweight and thin**- great convenience and easiness for on-site operators
- **Great flexibility**- has characteristics of tile screens

TOURING FRAME

The Touring Frame is especially design for the touring rental market. The lightweight alloys improve installation, transport and use of the 7.5 MM and Hybrid LED tiles. If housed in the touring frame, these innovative LED products can be used outdoors.

- **Light weight** magnesium alloy frame
- **Exclusive** outside design elements
- Improves installation, transport and use of LED products
