

ARCS WIDE

Intended for rental productions and fixed installations, the ARCS WIDE are medium-throw applications capable of delivering full-range coverage operating on a scale of 55 Hz to 20 kHz. Ideal for central clusters, side fill monitors or complementary fills, the ARCS compact, curved enclosure allow for unobstructed sightlines and a 30° x 90° symmetric directivity pattern. ARCS WIDE can be flown both horizontally or vertically, as well as mounted on a pole.

FEATURES | SPECIFICATIONS | BENEFITS

- **Bandwidth:** 55 Hz to 20 kHz
- **Miscellaneous:** 2-way Constant Curvature WST® enclosure 30° x 90°
- **Power:** LA4X amplifier
- **Maximum SPL:** 135 dB
