

DISGUISE VX4 MEDIA SERVER

The Disguise VX4 Pro Media Server has been engineered to play back video at higher quality, smoothness, and resolution than ever before. It has been optimised for playing up to four times uncompressed 4K60 using its high-performance NVME RAID drive array as well as playing lossless 10-bit video. The VX4 has even more bandwidth to offer with its dual 25 Gb/sec and dual 10 Gb/sec ethernet ports, enabling faster media file transfer and higher resolution networked live video capture. The vx 4 also supports HDR content and can apply colour profiles, as well as permit users to set a colour profile to content or capture images, with Disguise handling the conversion

FEATURES | SPECIFICATIONS | BENEFITS

- Video Output: 1x Displayport 1.2 (GUI) 4x VFC Output Slots Ships standard with HDMI 2.0 VFC cards (4096 x 2160 max)
- Video Input: 16x 3G-SDI
- Dimensions: W: 445mm (17.52"); H: 178mm (7"); D: 593mm (29.93")
- Weight: 21 kg
- Temperature: 5-35°C (40°-95°F)
- Voltage: 115-240V, 50-60Hz
- Power Consumption: 900VA @ 240V, 50Hz (Max)
