

INTERACTIVE TOUCH SCREEN KIOSK

LMG has added a new, unique interactive display solution for your next event. Designed with a 55" touch screen interface, this interactive kiosk offers six touch points, 1080p resolution, speakers, and built-in Windows-based computer wrapped into one self contained, free-standing, eye-catching display piece. Acting as a creative digital signage or wayfinding solution, on screen touch points can be programmed to maneuver the user through items such as show schedules, event information, maps, graphics, videos, games, documents, websites, or custom programmed, branded content for the needs of your show. Let us work with you to design this product to meet the needs of your next meeting, event or exhibit.
