

# L' ACOUSTICS KIVA II

Kiva II is a new ultra-compact modular line source, adding 6dB of max SPL, maximized amplifier density with 16 ohm impedance, and a new sturdy cabinet.

The Kiva II features L-Acoustics' Wavefront Sculpture Technology™ (WST), giving it a long throw capability and delivering even SPL from the front row to the back of the audience. The product's elegant lines and flush-fitted rigging allow it to melt into any architecture, making it a natural fit for installations in Performing Arts Centers and special events demanding minimum visual obtrusion.

## FEATURES | SPECIFICATIONS | BENEFITS

- Usable bandwidth (-10 dB) 70 Hz - 20 kHz ([KIVA II])
- Maximum SPL1: 138 dB ([KIVA II])
- Nominal directivity: Horizontal: 100° symmetrical; Vertical: 15° (single), depending on the number
- Acoustical Load: LF: bass-reflex; HF: DOSC, L-Fins
- Weight: 14 kg / 31 lbs.
- Amplifier Density: 16 ohms
- 138 dB of peak SPL (+ 6 dB SPL vs. Kiva)
- 15° inter-element vertical flexibility
