

Barco TLD+ Ultra Projector Lens

The Barco TLD+ Ultra is a short-throw lens that solves for the typical challenge of short-throw projection applications, by providing room for slight adjustment. This is especially valuable when flown since the truss does not always land in perfect relationship to the screen. Because of its para-focal nature, the lens is forgiving to the common short-throw challenge of a hotspot in the center of the screen. It is compatible with our existing Barco HDX W20 Flex, HDF W26, HDF W22 and FLM HD20 inventory, and is accurate in the Barco lens calculator.

FEATURES | SPECIFICATIONS | BENEFITS

- **Throw ratio:**
 - WUXGA: Approx. 0.8-1.16:1
 - SXGA+: Approx. 0.86-1.25:1
- **Weight:** Approx. 25 lbs
- **Dimensions:** 450.6mm (17.74") long x 193mm (7.6") in diameter
- **Compatible with** Barco HDX W20 Flex, HDF W26, HDF W22 and FLM HD20
