

ROBE POINTE

LMG has recently added the Robe Pointe to our lighting inventory. The super-fast Pointe can project static or rotating glass gobo that cuts through the air and across video. This new technology's small, lightweight body is designed from short arc 280 W discharge source and the Robe optical configuration. The crisp, clear output will cover all your show needs – Beam, Spot, Wash and FX. The 6 way linear or 8 way circular prisms both create wide effects and allow for endless beam effect options.

FEATURES | SPECIFICATIONS | BENEFITS

- Spot mode: 9 rotating and replaceable glass gobos
- Beam mode: 14 static gobo + open
- Color Wheel: 13 dichroic filters + white
- Unique 6-facet linear and 8-facet circular prisms
- 75,000 LUX @20M sharp parallel beam
- Weighs only 33lbs – lightweight body
