

3.9 MM LED

LMG has added a stunning 3.9MM tile to our LED video inventory for use on corporate events, concert tours, tradeshows, and live events. The ultra-thin 3.9MM product line provides an extremely high resolution and crisp display, with a 128 x 128 pixel pitch (per tile) for indoor applications, when seeing every detail on the screen matters. Weighing 18.7 lbs per tile, the 3.9MM LED series offers a standard frame size (500MM X 500MM) for ease of design applications and area calculations, and was built for faster assembly time installation, saving on time and expenses during setup of your next event.
