

AVOLITES MEDIA'S AI INFINITY EX8 WITH 4K OPTION

The new Avolites Media's Ai Infinity EX8 With 4K Option is the talk of the industry with its unique hardware features including LTC timecode input, DMX 512, Artnet output and a front panel touch screen showing the Ai Visualiser. The 8 full 1080p HD outputs include an internal EDID management and adds third generation PCI Express motherboards, graphic cards and RAID SSD drives. This design allows you to build and create in the 3D Stage Visualiser and can map and warp onto any 3D surface. In addition, it is customized with added 4K Ultra HD functionality compatible with LMG's 4K Ultra HD System.
